

DIGITAL DOCUMENT SERVICES

The leader in business process outsourcing solutions

With more than 12 million contracts processed each year, lenders can be confident our solution will improve efficiency, delivering digital documents (eDocs) in record time, while lowering costs. Digital Document Services (DDS) provides state-of-the-art scanning capabilities, custom software solutions and operation centers in the U.S and Canada, which give us the flexibility to scale and grow to meet the changing needs of our clients. We provide seamless technology integration, account management and customer support for every client. Our commitment to quality ensures your success. Plus, Dealertrack provides a full lifecycle of business process outsourcing services, from initial application through loan origination and title and collateral management.

Features and Benefits:

- Scanning, Indexing and Imaging services let lenders take advantage of quick turn times and a reduction in FedEx costs.
- Data Entry services capture information from the contract/ancillary documents and load data into the lender's loan origination system, allowing for faster funding and pre-identified exceptions.
- Through Verification services, document-based questions can be added to the data provided to the lender, further increasing the value of our services.
- Additional services available include used vehicle Bookout, CarFax Vehicle History, and The Work Number (TALX).
